I enjoy reading , Real Cases Solved by other agencies currently using the CVSA. I have completed approx. 300 examinations since I was certified in September 1996. With the use of the CVSA our agency has been able to solve many cases that would have gone unsolved. I also test all new Officer hires as well as civilians. We have been able to avoid hiring those persons that could have caused us future problems.

I have been able to test officers during the course of Internal Affairs Investigations. I had the opportunity to test an officer who had been with our department for a little over five years. His step-daughter alleged that he had been involved in sexual misconduct with her for about a year. During our Internal Affairs investigation, I tested this officer and his chart was DI. I wanted very much to believe the Examination was wrong. This Officer has since been convicted for Lewd Conduct with a Minor and is currently incarcerated, awaiting sentencing. I feel the use of the CVSA, helped us solve this case and get a bad cop off the streets. Thank You
